

Ecosystem Poster

Purpose: You and your partner(s) have now been enlisted as the next travel agent to the world's most exotic places. You will have to convince the class why your selected biome/ecosystem is so amazing and why they should visit. You will need to include the following information:

VISUAL (no written text other than a label):

1. 1 -2 pictures illustrating what this ecosystem looks like and where it is located
2. 2 pictures of plants
3. 2 pictures of animals

WRITTEN (you should be comfortable with the content where you do not have to read off the paper):

1. Describe the **Location** of your ecosystem
 - where in the world are these ecosystem found
 - Particular latitude?
2. Describe the **Climate** of your ecosystem
 - Temperature (⁰F)
 - Precipitation (rain, hail, sleet, etc. in cm/year)
 - Amount of sun/day length
 - Pressure (if underwater)
 - What is/are the limiting factors?
3. **Flora** and **Fauna Adaptations:**
 - What types of animals are found here (describe at least 2 interesting ones)
 - What types of plants are found here (describe at least 2 interesting/exotic ones)
 - What special/cool things do these organisms do to survive in this biome's environment (adaptations)
4. What are some **Environmental Threats** that endanger your biome
 - What are some of the natural/man-made dangers to your biome and its effect on the organisms there
 - What are some ways your audience can do to help your biome
