

## MEIOSIS DIAGRAM

Draw a **labeled** diagram of meiosis with 6 chromosomes. Include:

- 1) All phases including the three parts of interphase
- 2) Different colors.....they represent different parents
- 3) Different sized chromosomes....they represent different info
- 4) Centrioles, spindle, n. membrane where appropriate
- 5) Write the correct number of chromosome/cell for each phases.
- 6) Then redraw meiosis **with crossover**. Only draw the following phases: G1, S, P1, M1, T1, M2, T2
