

SCIENTIFIC METHOD DRY LAB HOMEWORK

1. Find an advertisement for a product. Determine the product's name and claim (what does the product say it will do). For example:

Product: Red Bull

Claim: it will give you "wings" = energy

2. Research an aspect about the product that makes it effective (usually an active ingredient or technology). Summarize from 1-2 sources and cite those sources. If possible, use MLA citation. For example:

Caffeine = active ingredient. Research about how caffeine give you "energy".
Usually _ - 1 page.

Citation =

Gavin, Mary. "Caffeine." *Teen Health*. The Nemours Foundation, 01-0002008. Web. 25 Aug 2010. <http://kidshealth.org/teen/food_fitness/nutrition/caffeine.html

3. Later in class you will discuss your advertisement and summary with you group and then decide on a possible product for your "dry lab".
